Why CISA  
is the solution

14

# CISA, a single partner

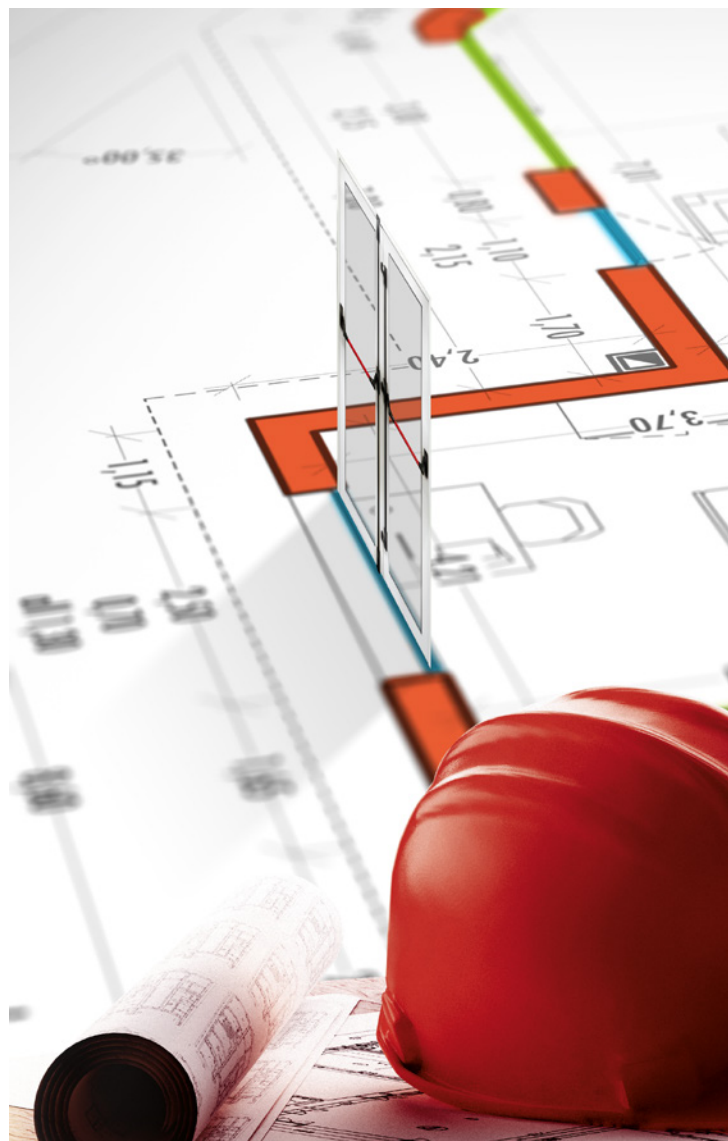

from concept to  
completion

**Safety is our priority. Established in 1926, CISA is the number one partner in the design and production of locking and access control systems for any kind of doors and entrances in any kind of environment (schools, homes, offices, hospitals, hotels...).**

CISA, a strategic brand of the Allegion group, leads the field in providing dedicated solutions to prevent unlawful access and ensure safe egress to everyone, even those with reduced mobility, in the event of danger or difficulty.

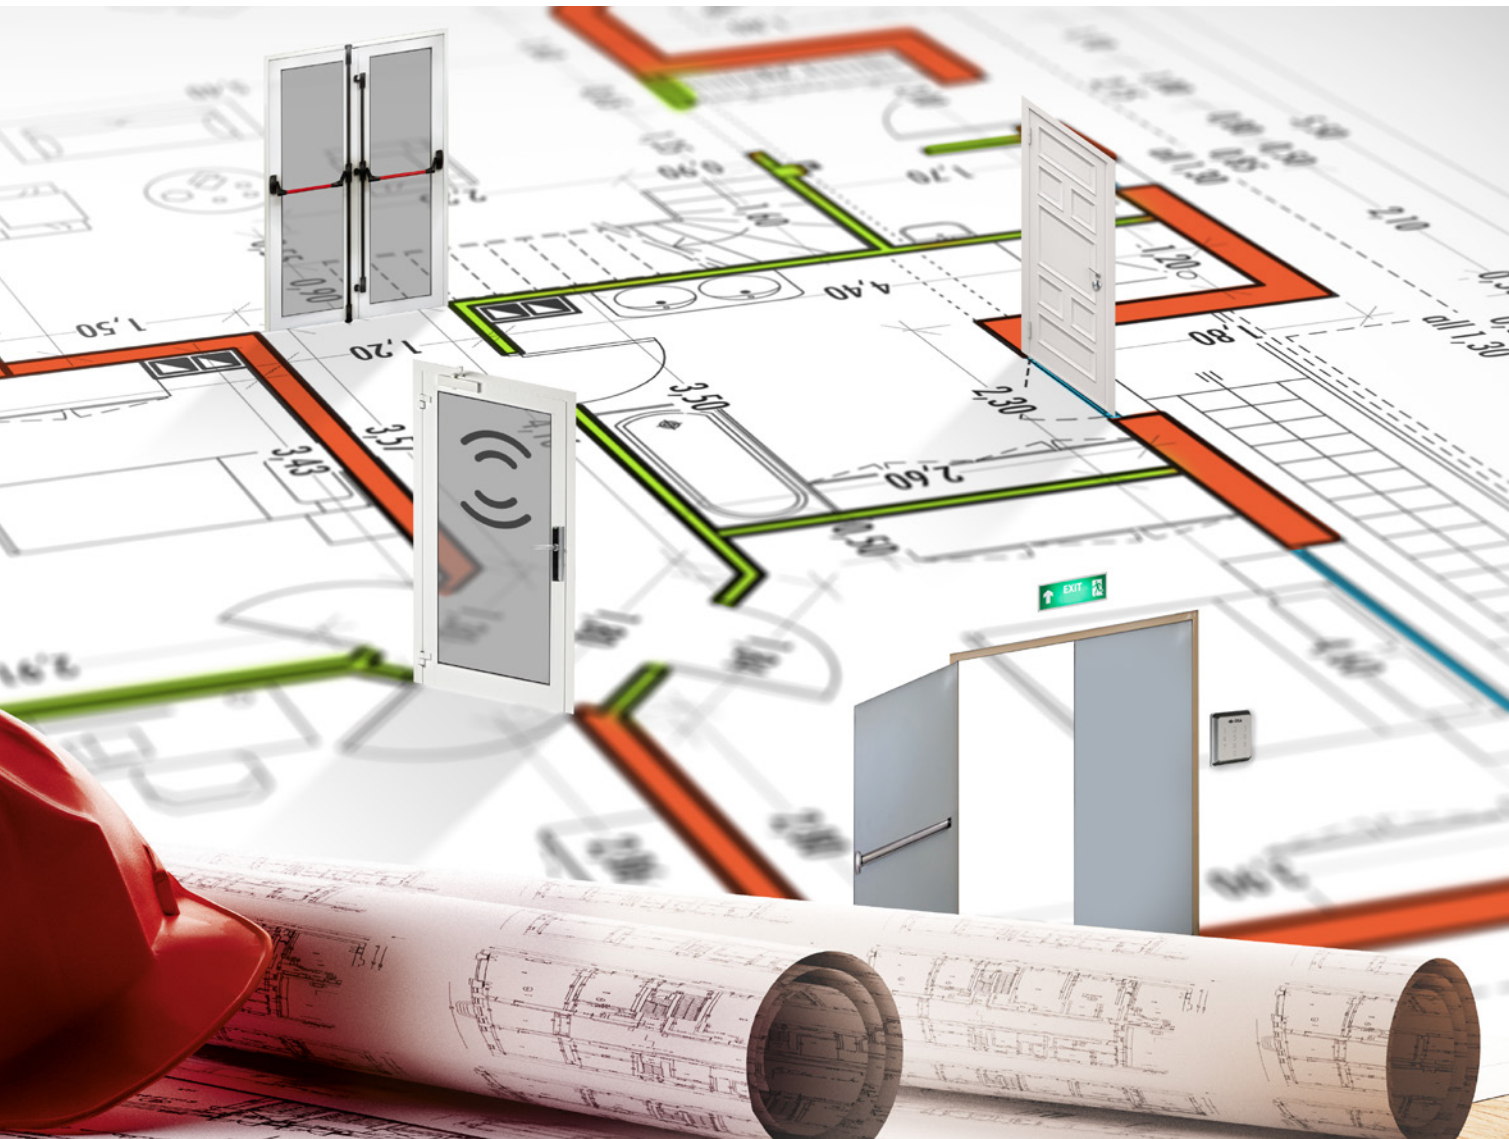

CISA operates nationwide, assisting security managers, architects, managers of technical departments, apartment building administrators and all those looking to protect their homes.

GROUP'S EMPLOYEES

We examine needs  
for every environment

## RESIDENTIAL

Protecting your home is your number one priority. CISA offers security solutions such as anti-intrusion locks, keys and access control systems to protect new or existing properties.

## COMMERCIAL

CISA develops access control solutions for commercial, professional and public environments. It offers customised security systems which prevent and hinder forced entry, while still allowing personalised access management.

## EDUCATION

Ensuring safety in schools is a complex business. CISA offers high-level security systems to keep people safe in an emergency and protect buildings. Entrances and exits are controlled to prevent unauthorised use but doors are still easy to open and access management optimised.

## HOSPITALITY

Hotels and community buildings are subject to heavy human traffic, with a large number of people coming and going at all times. CISA solutions control access in real time with intuitive management software and products designed to keep guests' belongings safe.

## HEALTHCARE

Healthcare facilities are complex structures which often operate 24/7 and where safety has to comply with regulations to protect the health of patients, visitors and staff. CISA's certified solutions protect people and guarantee controlled access to sensitive areas.

We design solutions  
for all needs

overview of the main solutions

## ACCESS MANAGEMENT

MyEVO is a motorised lock for armoured doors that automatically locks when the door is shut. With MyEVO you can also choose who to grant access to thanks to personalised codes.

## FOR LARGE AND SMALL ENVIRONMENTS

MobileKey is an intelligent electronic locking system designed for commercial environments and private offices. The system is cloud-based, it has a user-friendly interface and is easy to configure and operate.

# INTELLIGENT EMERGENCY EXITS

Integrating electronics and mechanics is a smart move in all applications. With its motorised components, eFAST transforms an emergency exit into an intelligent entrance.

# SECURITY AND FLEXIBILITY

eSIGNO is a contactless electronic lock that requires no wiring and meets the security needs of large and small buildings alike. It ensures continuous control of accesses with timed hierarchical entry for different environments, while offering the same unbeatable CISA security and flexibility.

# COMPLEX SITUATIONS

With CISA's master key systems, one key opens all doors. Each entrance is managed hierarchically. Benefits: access is restricted to authorised persons only, the number of keys needed and the risk of unauthorised duplication are reduced.

# Consultancy and training

## TEAM OF SPECIALISTS

- On-site visits and consultancy services
- Analyse needs and find solutions
- Assistance with specification writing
- Creating technical specifications and other documents

## NETWORK

- **CISA SOLUTION PARTNERS:** professionals offering services and advice in line with CISA's high standards, guiding clients in their choice of hi-tech solutions.

- **TECHNICAL ASSISTANCE CENTRES (CAT):** specialists offering assistance with installation, after sales and maintenance and upgrading agreements.
- **CISA SERVICE PARTNERS:** a network of selected partners who are trained and certified by CISA to design, manufacture, install and service its products

## TEACHING SAFETY

CISA organises training and refresher courses on a regular basis and upon request for workers in the sector like maintenance staff, and professionals such as designers and architects.

## REGULATIONS

Our team of experts guarantees regulatory compliance, providing all the necessary certifications.
